AVIATION LAW AND ECONOMIC STRATEGIES

Alena NOVÁK SEDLÁČKOVÁ

Abstract: This paper is about air law and economic policy and the future trends in these fields. There are specified principles and sources of this branch of law in context of civil aviation. It compares sources of international air law, European air law and the Slovak national air law that complies with the harmonization and unification of the European legislation. Usually policies changes law, but law does not change policies. In this field it is a different situation, because aviation law can change economic policy in the civil aviation. The situation, where we can find civil aviation law in cooperation with economic policy is the economic regulation of airports.

Keywords: air law, sources of law, civil aviation, economic policy and regulation of airports
